fast and in a cool plastic protective tube! Can't wait to frame it. Thank you so much!2 of 2 people found the following
review helpful. Cheap paper...By J. B ForgioneGood content, cheap product. It looks like someone just printed it on a
large-format plotter. There's little in the way of gloss, and the paper stock is extremely thin. I'd prefer to just buy the
image and have someone print it for me.

Explore the ridges, vents, deep sea life, and terrain of the Pacific with this physical map of the ocean floor. Includes
the Mariana Trench (the deepest place on Earth) and the Aleutian Trench, along with hundreds of islands labeled by
their sovereignty.The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label
showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:37,870,000Sheet
Size = 31.75" x 20.75"
