National Geographic Maps : Paris (National Geographic Destination City Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Paris (National Geographic Destination City Map):

Disappointing By Egon This should be titled: "Tourist map of some of Paris" as it only covers an area roughly spanning The Arche, the Eiffel and the Bastille. Maybe 2% of the city? For example, the Bourse (stock exchange) is not on it. A few more pages would have been helpful; I did not use this map on my trip. An analogy would be a "Map of New York City" that covers only midtown Manhattan! If they added a few more pages it would be good. On the other hand, if you plan on staying ONLY in the center of Paris it covers that rather well. The inserts of the airport terminals and Metro are helpful.

I marked our hotel and any restaurants we wanted to try with a dot and we never got lost. The map has all the major sites marked, plus all the metro stations. The subway map on the back was very helpful. I wish I had bought one for every city we visited.

I love the feel of it and I like that you can read the street names so clearly. It doesn't cover a very large area would be my only complaint, but if it did the streets would either be smaller or the map larger. It will be great for first-time travelers to Paris.
