Alexander Von Humboldt, Aime Bonpland : Personal Narrative of Travels to the Equinoctial Regions of America, During the Year 1799-1804 - Volume 3 before purchasing it in order to gage whether or not it would be worth my time, and all praised Personal Narrative of Travels to the Equinoctial Regions of America, During the Year

1799-1804 - Volume 3:

3 of 3 people found the following review helpful. Humboldt: Personal Narrative of Travels. . .By Phil ScottAs recommended by Darwin [in *The Voyage of the Beagle*]. . . . A certain amount of glossing is probably needed since some of the discussions require a better background in botany than is common to most readers. Other than that, the writing is stellar! Plan on having a dictionary on hand since many obsolescent terms will be encountered.0 of 0 people found the following review helpful. A disappointmentBy S. LeVayThis final volume is not up to the standard of the earlier volumes. The travel story peters out and is replaced by endless geological minutiae.0 of 0 people found the following review helpful. Great readBy Graham ClarkeExcellent book, written by an author with an obvious passion for the subject, complemented by a very readable writing style.

Alexander von Humboldt, sometimes called 'the last man who knew everything', was an extraordinary polymath of the late 18th and early 19th centuries. In 1798 he received unprecedented permission from the Spanish Crown to explore its American and Caribbean colonies, which he did from 1799-1804. This is the journal of those explorations, in which he extensively covers the region's topography, geology, fauna and flora, anthropology and comparative linguistics. Volume III sees him recording more information on Venezuela, visiting Cuba where he also writes about local politics and speaks out fervently against the slave trade; he then sails for Colombia. The volume ends with a comprehensive geognostic description of the northern part of South America.
