**Libreria : Peru 1:2,200,000 with 24 city plans Travel Map** before purchasing it in order to gage whether or not it would be worth my time, and all praised Peru 1:2,200,000 with 24 city plans Travel Map:

Peru 1:2,200,000 with 24 city plans Travel Map This authentic, Peruvian-made map of the whole country at 1:2,200,000 shows in some areas more villages than can be found on other maps. A separate diagram shows the country's three main north/south routes: the Pan-American Highway and the parallel inland mountain route and jungle route, with main locations and connecting minor roads. Added is a selection of Peruvian traffic signs with their names in Spanish and a distance chart. The map's main value lies in its numerous insets shown on the reverse side. A large, general overview map of Greater Lima 1:60,000 with its outer districts and main streets is supplemented by an inset with a street plan of the city centre 1:20,000. Further plans cover the central areas of 23 other cities and towns; main places of interest are highlighted on them. All text is in Spanish only.
