Philip's : Philip's Navigator Scotland. before purchasing it in order to gage whether or not it would be worth my time, and all praised Philip's Navigator Scotland.:

0 of 0 people found the following review helpful. A NecessityBy KCMMy only complaint is that there's insufficient detail for urban areas. This doesn't seem an unreasonable request considering how few cities there are in the country! Still, I highly recommend it to anyone planning to drive in Scotland. We used it in conjunction with a folding road map and in addition to SatNav/GPS. In spite of some wrong turns we had a very successful trip and are pleased we traveled independently. Driving on the left down narrow roads was challenging at times but the rewards were bountiful!0 of 0 people found the following review helpful. This is a must for traveling to Scotland!!By K. BerryWe took this to Scotland with us and it came in handy!! Loved it and highly recommend!! We had also bought the Michelin Map, but it was very large and difficult to open it up in the car... this book, loved that it was spiral bound and

pages stayed in place! I used small colored sticky notes to place near places that we saw or wanted to see, etc.0 of 0 people found the following review helpful. Only good for planning purposes....By Ann HatchGood " trip planning" map book but nothing compared to a good navigation system when driving. You can't read a map AND drive in Scotland. You'll end up in a ditch!

Philip's Navigator Scotland is part of a series of Navigator regional road atlases. The Navigator maps provide highly detailed coverage of the region's road network, including minor country lanes and rural tracks. In this atlas, much of the Central Lowlands and Scottish Borders are shown at 1.5 miles to 1 inch, while the rest of Scotland is shown at 3 miles to 1 inch. There is an abundance of other detail, including hundreds of individually named farms, houses and hamlets. Also shown are airports, airfields, stations, ferries, canals, marinas, and a wide range of places of interest. There are also useful details of many services that may be needed while travelling, such as tourist information centres. The atlas has a comprehensive index and includes indexed town plans of major regional centres. The front of the atlas contains a 15-page guide to regional leisure with full details of places of interest, such as castles, houses, cathedrals and museums, plus guides to nature reserves, parks and gardens, and listings of a wide variety of activities from abseiling to yachting. The atlas is designed with the leisure user particularly in mind, and is ideal for touring with its large scale and wealth of travel information. The exceptional detail also makes the atlas ideal for local business use, such as planning and delivery driving.
