Tom Harrison : Pinnacles National Monument Trails Map (Tom Harrison Maps) before purchasing it in order to gage whether or not it would be worth my time, and all praised Pinnacles National Monument Trails Map (Tom Harrison Maps):

It might be nice to hang on a wall, but will certainly not survive out on the trail. I almost tore it just unfolding it the first time I looked at it. If this was on a heavier paper stock, I would have given it a better review. I don't see this surviving much time on the trail if it has to be used a reference very often. A little too pricey for the product quality in my opinion.2 of 2 people found the following review helpful. Free version in park is betterBy SherryThis map is OK but the free map in the park is better. This map does show contour lines and grid coordinates, but if you stick to the trails you don't need them because the trails are so well marked.1 of 1 people found the following review helpful. it's fine.By Thomas K. GossThis map was ok, but no more detail than the normal NPS map you get free when you get to the park. It is somewhat waterproof and tear resistant, so if you're looking for that, it's fine.

A shaded relief topographic maps of the Pinnacles National Monument in California with all the trails illustrated with accuracy. Scale 1:24,000 and contour interval of 40 feet. Published by Tom Harrison Maps
