Greenpeace : Planet Ocean Postcard Book: 30 postcards that will take you on a worldwide ocean voyage before purchasing it in order to gage whether or not it would be worth my time, and all praised Planet Ocean Postcard Book: 30 postcards that will take you on a worldwide ocean voyage:

2 of 2 people found the following review helpful. Discovering Our Fragile PlanetBy AunteyEmThis book of postcards offers a wide assortment of beautifully photographed of Planet Earth, her creatures and the reminder of what we stand to lose if we continue our current path of destruction. I love the vividness and boldness of the cards. From whales to

hummingbirds, ocean depths to paths of lava this book delivers on beauty and quality of the cards. If you are buying the book of cards with no intention of sending them, the book is perfect. If you intend to send the cards, I will say that they are very difficult to remove and patience is required to extract them with no harm to the card. If you are a postcard enthusiast and love nature, this is the book for you! 0 of 0 people found the following review helpful. Five Stars By steve nobles Everything worked out well! 1 of 1 people found the following review helpful. Decent set of postcards By Ultramagnetique Good size and sturdy paper stock, some of the images are not too interesting... I mailed out probably half, the rest will most likely not get used.

This book includes thirty full-color postcards, selecting some of the best photographs from the Greenpeace Defending our Oceans expedition. It is published to accompany the large-format cloth edition of Planet Ocean and is branded with the Greenpeace logo.

About the Author Daniel Beltra has documented several Greenpeace expeditions to the , the Arctic, the Southern Oceans, the Patagonian Ice Fields, among many others. His work has appeared in publications such as Time, Business Week, Der Spiegel, Geo, Paris Match, Stern, and many others. He has won several World Press Photo Awards.
