Frederic B. Mayo : Planning an Applied Research Project in Hospitality, Tourism, and Sports before purchasing it in order to gauge whether or not it would be worth my time, and all praised Planning an Applied Research Project in Hospitality, Tourism, and Sports:

0 of 0 people found the following review helpful. The only book on hospitality and tourism research that you need By Martine Bakker This is the ultimate book for those looking how to prepare an applied research project in hospitality or

tourism. The book is comprehensive and very well structured. It guides you through the process of setting up a research proposal and provides many examples. Most important of all, the book reads very well and makes the theory easy to understand. Can recommend it for all who are new to hospitality and tourism research or for those who like to expand their research skills. 1 of 1 people found the following review helpful. Bible of Planning and Applied Research By Xu Yulin This applied research book is treated as the Bible by me since it's so systematic, informative and reading-friendly. For each theory, it not only lists the clear definition and explanation, but a very detailed example to let you know how to apply the theory and format as well. I highly recommend this book. 1 of 2 people found the following review helpful. Outstanding!!!! By Maurice W. Dorsey, Ph.D. Clinical Professor, New York University, Dr. Fredric Mayo has done a masterful job researching and writing this book. It is a comprehensive and well documented textbook for planning an applied research project in hospitality, tourism and sports industries. Devoting his career to the education of professionals throughout the world, he has once again advanced and added new knowledge to this field of work. In his book, Dr. Mayo takes the learner from the entrance of the research process and brings them to the successful conclusion of a scholarly research proposal. For those interested in this industry this is an outstanding opportunity to leap to the future.

Planning an Applied Research Project in Hospitality, Tourism and Sports provides a comprehensive and carefully structured treatment of all the aspects involved in planning a research project. Instead of being a statistically oriented book, this text provides a conceptual and process-oriented approach to planning and conducting research. Written for both students and professionals, it is easy to read, short, and to the point, i.e., practical. The book provides basic, yet comprehensive information about doing research, and can be used not only in a research methods course where students will have to plan and conduct a research project, but also in earlier course work to help students learn to write research papers. Planning an Applied Research Project in Hospitality, Tourism and Sports covers a range of subjects including: selecting a topic, conducting a literature review, developing a coherent design, and using various research techniques such as interviews, questionnaires, and observations. It also contains information on analyzing data once it has been collected and developing a proposal to obtain support before undertaking a research project. Unique coverage includes: 2 chapters on conducting and writing a literature review, 1 chapter on analyzing data (from both a qualitative and quantitative perspective), 1 chapter on writing a research proposal, and 3 detailed chapters on techniques.
