I was good to reflect on places visited, with many good memories.It was a reminder the world is full of things to see and to experience. Cultures to explore, exciting flavors to test the palate and new friends to meet.However I am not sure I could carry all my hair and face products in a backpack!! So I would need a wee different mode of travel to see the world.I wish I could have seen color photos of the places visited.I have recommended the book to my fellow travelers.0 of 0 people found the following review helpful. Fun to read!By CustomerThis book is fun to read. A light hearted and interesting account of the author's backpacking trip south from his home in Missouri all the way to Antarctica. He then goes north to Prudhoe Bay.I found myself envying his courage and, while I could never pitch a tent in Torres del Paine or the Alaskan wilderness as he did, a little part of me would love to try. Be you ardent backpacker or armchair adventurer you won't be able to put this inspirational and entertaining book down.

Backpacking in North and South America by Bus , From The North Slope at Prudhoe Bay To the Icebergs of Antarctica
