There were some interesting, well researched tidbits, but for the most part part the author came across as arrogant and snobby. I started skipping large sections of the book where he was talking about himself. Side note: NZ is no longer as cheap as it was whenever he wrote the book - he mentions costs frequently, but they aren't accurate.3 of 3 people found the following review helpful. Felt as if I was there, tooBy J. MurphyStraying

from the Flock; Travels in New Zealand made me feel as if I'd actually visited the country. Each time I put it down, I was surprised to find that I was not in New Zealand. This is not a guidebook; it is a description of a trip taken by a wealthy person. Mr. Elder's vacation included comfortable lodgings, sampling wines, renting fishing boats, and taking a helicopter trip to a volcano. (Mine would include backpacking, sleeping outdoors, visiting a couple of museums, and only one extravagance: swimming with dolphins.) Even though this book won't help me plan my trip, I found it worth reading because it conveyed the beauty of the country and friendliness of its inhabitants. I enjoyed the book, but I can understand why it received some negative reviews. Several times, the author puts in writing comments about people that most of us would only whisper-- if we said them at all. The very first chapter starts with several unkind observations. Fortunately for readers, he admires nearly all of the people he meets and he loves New Zealand. (Perhaps his "honesty" put me inside his head, and that is the reason I felt as if I was sharing his trip through New Zealand.) It is nice when Mr. Elder mocks his own foibles. One of them is his obsession with the lack of guard rails at the sides of New Zealand roads; he mentions the topic so many times that it made me laugh, too. His comparison of Australia's and New Zealand's histories and cultures is intriguing, but almost certainly exaggerated and unfair to Australians. The kiss-and-tell in chapter 41 seemed out of place; I did not want to know about it and I'm sure the object of his affections would prefer that he hadn't shared their private evening, her real name, and the town she lives in. So why did I give the book four stars?~ He spoke with many different people and he must be a great conversationalist because he learned an amazing amount about New Zealand, including its culture, economy, history, politics, and agriculture.~ He is a very good writer. The fact that English is his second language only highlights that fact. His descriptions of scenery are vivid, whether he is in the mountains or on a beach, in someone's living room or on a boat.~ While many of his travel suggestions are extravagant (only fly business class?! \$\$\$), all of them strike me as good advice.~ His recollections of his earlier trips to New Zealand with his children are very sweet.~ Finally, his love of New Zealand is palpable. The book was so engaging that I feel as if I have visited New Zealand. And I can't wait to visit again.

Basically every other book has been a travel guide, some of which are useful, but none of which are a narrative of a person's experience in New Zealand. Alexander Elder is a frequent traveler to New Zealand and he relates his story of traveling from the south tip to the northernmost tip of the country over the course of eight weeks (with a few days in Fiji and Australia). He meets new people and visits old friends along the way. I really enjoyed this book, my only issues were that I couldn't completely relate to his way of traveling. He travels in a style where laying down several hundred dollars to get a guided trip a few times in a week is no issue. I tend to be on a much more restricted budget. He also has a bit of a different attitude than myself, more strict about superb service and attention than I probably would be, but it's his story not my own :) He does give a good impression of the hospitality that is present in most New Zealanders as well as the beauty of the land itself. I often felt like I was right along side of him during his trip. This is a good read for anyone interested in New Zealand, especially being a tourist there. He also provides a link to his website where he posted the photos (non-professional) that he took during the course of this trip, a nice little addition to enhance the story.
