It's complete. I have a new appreciation for National Geographic, just because of these maps. This lets me find my trail in a minute, and to change my path with confidence just as quickly. You should buy one just to support this amazing organization, National Geographic in their endeavor to produce these guides that just might not be here if they didn't. They let you go into the wild and see things you may have never known were there. Thanks National Geographic.2 of 2 people found the following review helpful. Great Map!By AJ ChandlerI haven't found many topo maps of the Superstitions including trails that I am happy with. This one is very good. It encompasses a larger area than I wanted, but is large enough I can see the details. It is also made of a durable material. I wouldn't call it paper. This allows folding and fits nicely in my back pocket once folded over. I break this map out when planning a hike in addition to the information from hikearizona.com.FYI - I use a cell phone GPS which often drops in the Superstitions due to lack of cell towers so this map is a great back up in case batteries die, GPS breaks, etc.0 of 0 people found the following review helpful. I recommend this to anyone who may visit the areaBy hut71I have used the Trails Illustrated series of maps from National Geographic for years in Colorado and now in Arizona. They are accurate and compliment your GPS, and will keep you alive when your GPS dies!
