From Actar : Suprarural Architecture: Architectural Atlas of Rural Protocols in the American Midwest and the Argentine Pampas before purchasing it in order to gage whether or not it would be worth my time, and all praised Suprarural Architecture: Architectural Atlas of Rural Protocols in the American Midwest and the Argentine Pampas:

The Atlas of rural protocols in the American Midwest and the Argentine Pampas is structured along eight systems of organization: transport and infrastructure, land subdivision, agricultural production, water management, storage and maintenance, human habitation, animal management, land management. Each of these systems possesses a number of organizational types, material components, normative relationships, and spectra of performance, which become available through a manual of instructions for a Suprarural architectural environment. The research is based on a

realistic-overriding ethics towards design that operates by abstracting and intensifying unexplored territorial phenomena. Essays by Ciro Najle, Llus Ortega, Anna Font, Paul Andersen, David Salomon, Teresa Gal, Ramon Faura, Julian Varas, Francisco Cadau, Llus Viu, and Axel Cherniavsky. Photography by Pablo Gerson. Awarded by Graham Foundation for Advanced Studies in Fine Arts.

About the Author Ciro Najle, Architect, Universidad de Buenos Aires 1991 (hons), Ms AAD Columbia University 1997 (hons), Dean at Universidad Torcuato Di Tella School of Architecture and Urban Studies and Design Critic at the Harvard GSD.
