Chris Nelson, Demi Taylor : Surfing Britain (Footprint - Activity Guides) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Surfing Britain (Footprint - Activity Guides):

The most comprehensive guide to Surfing in Britain ever produced. Detailed break information, tips and advice from Britain's top surfers, board advice from the UK's top shapers plus insider knowledge from local rippers is combined with awesome full colour photography, detailed and accurate mapping, swell forecast charts for the whole of Britain as well as surfer friendly places to sleep, eat, drink and get hold of hardware.

"There is plenty of information on each spot and also plenty of good colour photos throughout. The surfers tales give a good insight into the atmosphere of local surfers and a board guide shows what the guys that know their waves are riding. All in all a very useful guide laid out really well." Wavelength "NEW and in our opinion the best guide to

surfing yet produced" A1 Surfshop "The ultimate travel companion - exploring not only the waves of Europe but also its diverse culture, because surf and travel are inextricably linked." Sam Lamiroy, top European pro surfer and all-round good Geordie bloke!"
