Sustainability in the Hospitality Industry, Third Edition, is the only book available to introduce students to economic, environmental and socially sustainable issues specifically facing the industry as well as exploring ideas, solutions and

strategies of how to manage operations in a sustainable way. Since the second edition of this book, there have been many important developments in this field and this latest edition has been updated in the following ways: Updated content including sustainable food systems, hotel energy solutions, impacts of technology, water and food waste management, green hotel design, certification and ecolabelling systems and the evolving nature of corporate social responsibility strategies. New chapters exploring environmental accounting and the internalization of externalities as well as the management of accessibility in hospitality. Updated and new international case studies with reflective questions throughout to explore key issues and show real-life operational responses to sustainability within the hospitality industry. This accessible and comprehensive account of Sustainability in the Hospitality Industry is essential reading for all students and future managers in the hospitality industry.

Highly recommendable for those students and managers interested in exploring ideas, solutions and strategies about how to manage sustainable operations within the hospitality industry." -Miguel Angel Gardetti, Director Center for Studies on Sustainable Luxury and Advisory Board Member Center for Study on Sustainable Hotels. "The 3rd edition of the Sustainability in the Hospitality Industry provides insights into environmentally sustainable management in hospitality and tourism. Topics include social, economic and environmental issues hospitality and tourism industry leaders need to understand in order to develop effective sustainability strategies. Case studies are used the book to provide readers with real-world examples intended to better understand how solutions can be developed to meet challenges.
