enjoyed this book. It is very adventurous and you can't help but fantasize about traveling yourself when you're reading it. It's somewhat geared toward women as both of the authors are women, but as a girl I liked that. It tells you how to pick out a proper sleeping bag, pad, backpack, and almost any other gear you may need, with lots of check lists and wonderful little travelogues from fellow travelers in between chapters. While perhaps they are a little too concerned about thieves, it is a very fun and enjoyable read. If you enjoy planning and traveling in your imagination before you actually start out on your adventure, then I highly recommend this book for you! PS. I'm posting this with my dad's account because mine won't post reviews. 16 of 17 people found the following review helpful. Marginal At Best By A Customer Brought to you by Cosmo? This book is more about travel from city to city with a four star motel meets Lonely Planet... Should not be in the backpacking section. All of the sources are limited to the UK. 0 of 1 people found the following review helpful. It's actually New! By CriticBook is clean with no scratches and never opened.
